

# Bernard Yang

JR. FRONT END DEVELOPER  
VANCOUVER, BC

## PROJECTS

### Raider.io API Data

An app that calculates WoW in-game player count using automation with AWS Lambda and CloudWatch

- Implemented a Lambda function to automate an external API call and write data to DynamoDB
- Used API Gateway to read the database and output a graph on the front end using Chart.js

### Twitter React

A simple Twitter like app with login validation, and reusable React components

- Used modern React Hooks for form state management including using useReducer
- Implemented responsive web design for mobile devices

### Make My Day

A project management app and Kanban board for teams to manage projects and organize tasks

- Built drag and drop Kanban board that auto-prioritize tasks based on due date and priority
- Created RESTful routes for users to create, edit and delete projects and tasks
- Implemented WebSocket for team members to communicate in real-time

## EXPERIENCE

### Realtor

Macdonald Realty | 2018 - 2020

- Prepared legal documents, marketing materials, and setup appointments

### Insurance CSR

Tony Lau Insurance | 2015 - 2018

- Advised clients on coverage options on home, auto and travel insurance
