

Bernard Yang

JR. FRONT END DEVELOPER
VANCOUVER, BC

PROJECTS

M+ Player Count

An app that calculates WoW in-game player count using automation with AWS Lambda and EventBridge

- Implemented a Lambda function to automate an external API call and write data to DynamoDB
- Used API Gateway to read the database and used Chart.js to output a graph on the front end

Twitter React

A simple Twitter like app with login validation, and reusable React components

- Used modern React Hooks for form state management, including useReducer for login validation
- Implemented responsive web design for mobile devices

Make My Day

A project management app and Kanban board for teams to manage projects and organize tasks

- Built drag and drop Kanban board that auto-prioritize tasks based on due date and priority
- Created RESTful routes for users to create, edit and delete projects and tasks
- Implemented WebSocket for team members to communicate in real-time

EXPERIENCE

Realtor

Macdonald Realty | 2018 - 2020
