

Bernard Yang

JR. FRONT END DEVELOPER
VANCOUVER, BC

PROJECTS

Mythic+ Player Count

An app that calculates player count in WoW using automation with AWS Serverless Computing

- Scheduled a Lambda function to call an external API once a week and store a modified JSON file to a database
- Implemented a React front end graph with Chart.js

Twitter React

A simple Twitter like app with reusable React components and sign-up validation

- Used modern React Hooks for form state management, including useReducer for multi-input validation
- Implemented responsive web design for mobile devices

Make My Day

A project management app and Kanban board for teams to manage projects and organize tasks

- Built drag and drop Kanban board that auto-prioritize tasks based on due date and priority
- Created RESTful routes for users to create, edit and delete projects and tasks
- Implemented styling with Material UI
